SUMMARY

Experienced audio engineer transitioning into journalism, bringing a strong background in storytelling, technical precision, and media production. Skilled at capturing compelling, intersectional stories while meeting tight deadlines and adapting to fast-paced environments. Passionate about multimedia narratives and production expertise to inform, engage, and connect audiences through the community of sports.

PROFESSIONAL EXPERIENCE

FREELANCE JOURNALIST **Feb. 2026**
Arizona Republic, Scottsdale, AZ

- Reported on the 2026 WM Phoenix Open, utilizing ShotLink data to produce a feature on the statistical probability of aces at the 16th hole "Coliseum."
- Reported on the "Good Good Golf" phenomenon during the 2026 WM Phoenix Open, analyzing how the creator group's presence signaled a shift toward younger, digital-native audiences in professional golf.
- Interviewed high-profile content creators and tournament officials to deliver a cross-platform narrative on the evolving landscape of sports entertainment for a national audience.
- Curated a comprehensive, multi-day digital timeline for the 2026 WM Phoenix Open, ensuring the *AZCentral* audience had an interactive experience of the tournament.

CONTRACT AUDIO EDITOR **Nov. 2024 – Aug. 2025**
SiriusXM Sports Newsroom, New York

- Edited live sports events for timely updates, enhancing content quality and relevance.
- Curated audio content for top sports stories and highlights, ensuring comprehensive coverage.
- Coordinated feeds and operated broadcast software, boosting operational efficiency.
- Delivered high-quality audio edits from press conferences and games under tight deadlines, improving listener engagement.

AUDIO ENGINEER **July 2022 – Aug. 2025**
National Public Radio, New York

- Engineered audio for 120+ live broadcasts, optimizing sound quality through meticulous mixing and real-time troubleshooting in NPR's Lawo facilities.
- Pioneered efficient audio repair techniques, swiftly addressing impaired audio to maintain NPR's high-quality broadcast standards under tight deadlines.

- Elevated 150+ podcasts with advanced audio processing, ensuring top-tier production standards using DAVID Systems MTE, AVID Pro Tools, and Izotope Rx.
- Mentored journalists on NPR's technical facilities, fostering skill development and enhancing overall production quality across the organization.
- Orchestrated seamless audio routing and scheduling, collaborating with producers and directors to deliver flawless live and pre-recorded content.

RADIO ENGINEER **Aug. 2023 – Aug. 2024**

Lawo Inc. Brooklyn, NY

- Optimized Lawo broadcast equipment configurations, enhancing signal quality and reducing latency for seamless live productions.
- Partnered with clients to tailor Lawo solutions, ensuring optimal integration with existing broadcast infrastructure and workflows.
- Pioneered IP-based audio routing strategies, facilitating flexible and scalable broadcast operations across multiple production sites.
- Streamlined equipment troubleshooting processes, minimizing downtime and maintaining high broadcast reliability standards.
- Spearheaded adoption of emerging audio technologies, positioning clients at the forefront of broadcast industry innovations.

AUDIO PRODUCER **Feb. 2022 - July 2022**

Bloomberg LP, New York

- Managed 7-hour live broadcasts, ensuring precise audio mixing and seamless production.
- Fostered seamless communication with studio teams and engineers, swiftly resolving technical issues to maintain broadcast continuity.
- Streamlined pre-production processes by efficiently reviewing rundowns and assigning microphones, IFBs, and mix-minus feeds for anchors and guests.
- Utilized advanced audio boards and signal flow knowledge to deliver consistent results.
- Expertly operated Calrec Artemis audio boards and RTS intercom systems, maintaining precise control over complex audio environments in real-time.

CONTRACT BROADCAST ENGINEER **Nov. 2021 – Feb. 2022**

New York Yankees, New York

- Resolved technical issues swiftly, boosting broadcast reliability and reducing downtime.
- Collaborated with engineers to ensure seamless live TV operations, enhancing viewer experience.
- Adapted to changing priorities, maintaining momentum, and achieving project goals.
- Analyzed signal flow to improve efficiency and minimize disruptions.
- Evaluated tech performance, ensuring alignment with industry standards.

SEASONAL AUDIO ENGINEER **May 2021 – Oct. 2021**

Worcester, MA

- Managed stadium audio, enhancing fan experience with precise sound control.
- Produced live shows, ensuring seamless audio for events and performances.
- Edited and mastered audio projects, delivering high-quality sound.
- Maintained audio equipment, ensuring reliability and optimal performance.
